1 April 2008

At last ...
A Safety Management System for the SME sector

In response to demand from the SME sector, IFAP and leading safety systems development company, Netsight, have launched a new online OSH management solution.

Following on from the success of *Trilogy* and *myosh custom*, the new product, named simply *myosh*, brings the power of the fully customised versions at a fraction of the price.

Starting at only \$50 a month, the system features modules including:

- Risk/Hazard Register;
- Incident Reporting;
- Action Management;
- Inspections & Audits;
- Training Management;
- OSH Documents;
- OSH Records;
- OSH Alerts; and
- Safety meetings.

The success of *myosh* lies in the fact it can offer a logon to all staff; is easy to use and access through its web-based platform; and offers a complete system (no more paying for additional modules).

myosh custom is currently used globally by industries including oil and gas, mining, construction, aviation and agriculture. A multi-lingual version is also available in Asia.

For more information visit www.myosh.com.
